

(a) (i) To design a set of Huffman codewords:

Huffman
codetree:

Huffman codeset

A: 1100

B: 001

C: 01

D: 101

E: 100

F: 111

G: 000

H: 1101

Compression ratio:

= $\frac{\text{data requirement for uncompressed data}}{\text{compressed data}}$

Message X:

- uncompressed scheme: $8 \times 3 = 24$ bits
- compressed scheme: $3 + 2 + 2 + 3 + 3 + 3 + 3 + 3$
= 22 bits

$$\text{Compression ratio} = \frac{24}{22} = 1.09$$

Message Y:

- uncompressed scheme: $8 \times 3 = 24$ bits
- compressed scheme: $4 + 3 + 4 + 2 + 3 + 4 + 4 + 3$
= 27 bits

Comp. ratio

$$= \frac{24}{27} = 0.89$$
